2-4 利用阶跃函数写出图示波形的表达式。

图p2-4

2-10化简下列各表达式。

$$(1) \int_{-\infty}^{\infty} e^{t} \delta(t-3) dt$$

$$(2) \int_{-\infty}^{\infty} \frac{\sin 2t}{t} \delta(t) dt$$

(3)
$$\int_{-\infty}^{\infty} \varepsilon(t+1)\delta(t-1)dt$$

(4)
$$\delta(2t)$$

2-16求下列微分方程的解。

(1)
$$y''(t) + 4y'(t) + 3y(t) = x(t)$$
, $x(t) = 3\varepsilon(t)$, $y(0_{-}) = 0$, $y'(0_{-}) = 3$

(2)
$$y''(t) + 4y'(t) + 3y(t) = x(t)$$
, $x(t) = e^{-2t} \varepsilon(t)$, $y(0_{-}) = 0$, $y'(0_{-}) = 3$
